

# Introduction to Vertex AI

- Platform for novice users all the way to experts
- Provides tools all the machine learning steps
- MLOps tools within a single, unified workflow
- Machine learning tasks can be done using
  - AutoML
  - Custom Code
- Explainable AI helps in understanding the model in a better way
- Model can be easily deployed and the results can be obtained with the help simple API

# Overview of Vertex AI

Data Readiness ► Feature Engineering ► Training ► Model serving ► Tuning ► Edge ► Model monitoring ► Model management
