Step 3 of 3 Payment Information Verification

Your payment information helps us reduce fraud and abuse. You won't be charged unless you turn on automatic billing.

Account type

Individual

Only Business accounts can have multiple users. You cannot change the account type after signing up. In some countries, this selection affects your tax options. [Learn more](#)

Payment method

Card number

#

Card number is required

When billing starts, you'll be charged automatically, typically monthly.

⚠

Reserve Bank of India requires that cards support automatic payments according to RBI regulations. If your card doesn't support automatic payments, you'll need to make manual payments or use a different card. We'll check your card in the next step. [Learn more](#)

Tax information

The personal information you provide here will be added to your payments profile. It will be stored securely and treated in accordance with the [Google Privacy Policy](#).

The screenshot shows the Google Cloud Platform 'Getting started' page. The browser address bar shows the URL: <https://console.cloud.google.com/getting-started?project=vibrant-castle-342714>. The page header includes 'Google Cloud Platform' and 'My First Project'. The main content area features a welcome message 'Welcome, Hemanth' and 'Get started with Google Cloud'. Below this, there is a section titled 'Begin with the basics' which includes a 'GO TO CHECKLIST' button and a list of tasks covered: 'Reviewing billing, credits, and projects', 'Finding products and APIs', 'Adding resources to a project', and 'Understanding and calculating pricing'. Further down, there is a 'Top products' section with a 'VIEW ALL' button. The 'Compute products' section highlights 'Compute Engine' with a 'GO TO COMPUTE ENGINE' button and lists other popular compute options: 'Kubernetes Engine', 'App Engine', 'Cloud Run', and 'Functions'.

Google Cloud Platform My First Project

Search Products, resources, docs (/)

Welcome, Hemanth

Get started with Google Cloud

Begin with the basics

Get up and running quickly by checking off common tasks

[GO TO CHECKLIST](#)

Setting up Google Cloud for scalable, production-ready enterprise workloads?
Use the [Google Cloud setup checklist](#) designed for administrators.

What's covered

- Reviewing billing, credits, and projects
- Finding products and APIs
- Adding resources to a project
- Understanding and calculating pricing

Top products [VIEW ALL](#)

Compute products

 Compute Engine

Made by Google

Scalable, high-performance virtual machines

[GO TO COMPUTE ENGINE](#)

Other popular **compute** options

[Kubernetes Engine](#)
One-click Kubernetes clusters, managed by Google

[App Engine](#)
A platform to build web and mobile apps that scale automatically

[Cloud Run](#)
Fully managed compute platform for deploying and scaling containerized applications quickly and securely

[Functions](#)
Event-driven serverless functions
